PHYSIOTHERAPY

[www.skillbuilders.com.au](http://www.skillbuilders.com.au)

Skillbuilders was founded in 1995 as a private WA-owned allied health service provider specialising in the delivery of multidisciplinary therapy services for children. In addition to its exceptional team of highly qualified specialists, Skillbuilders also sells a range of top quality therapy and educational resources and equipment across Australia.

# SKILLBUILDERS

Building Kids' Skills for Living and Learning

## PHYSIOTHERAPY SERVICES AT SKILLBUILDERS INCLUDE:

- Detailed assessment of strength, muscle tone and motor skills
- Tailored treatment devised and negotiated with parents
- Individually designed therapy programmes for each child
- Practical supportive advice given to parents and carers, including education on play skills to enhance childhood development
- Therapy options are individual sessions, group programmes or home programmes

- Physiotherapy services are provided either at our centre, or at your child's school or Day Care Centre.
- Skillbuilders Physiotherapists regularly provide information sessions and workshops for parents and/or teachers. These sessions are tailored to meet the requests of the group. School screening services are provided to a range of schools in the South Metro area.

## WHEN TO SEEK PHYSIOTHERAPY:

Physiotherapists can help babies and children learn to improve the quality of their movement. Your child will benefit if any of the following are present;

- Motor skill delays e.g. crawling, walking
- Motor co-ordination difficulties
- Specific conditions, eg. Cerebral palsy, developmental disabilities, motor skills related to autism
- Positional turning of the head, torticollis or plagiocephaly in babies
- Musculo-skeletal problems (unusual walking or running patterns, toe-walking and posture etc)
- General fitness and community sport participation
